

## **Restricted Axle Weights**

5 ton road Steering = 10,000 pound.....Rear = 10,000 pounds

7 ton road Steering\* = 14,000 pounds.....Rear = 14,000 pounds

9 ton road Steering\* = 18,000 pounds.....Rear = 18,000 pounds

\*Important: Tire size and ratings may not allow the maximum axle weight; especially if there are single tires on each wheel. In those cases, the tire size and rating would determine the axle weight up to but not over the restricted axle weight.
