

Restricted Axle Weights

5 ton road.....Steering 10,000 pounds Rear axle group 28,611 pounds

7 ton road.....Steering* 14,000 pounds Rear axle group 45,778 pounds

9 ton road.....Steering* 18,000 pounds Rear axle group 51,000 pounds

These axle weights could be used up to the legal weight of the truck from the Minnesota Gross Weight Table, which in this case is 64,500 pounds based on 5 axles spaced 26 feet.

***Important:** Tire size and ratings may not allow the maximum axle weight; especially if there are single tires on each wheel. In those cases, the tire size and rating would determine the axle weight.
